

Arvada, Colorado [Water]

The 'AA+' water revenue bond rating reflects the system's 'Very Strong' financial profile in the context of its 'Very Strong' revenue defensibility and 'Very Strong' operating risk profile, both assessed at 'aa'. The system's leverage of -0.8x in fiscal 2023 (FYE December 31), measured as net adjusted debt to adjusted funds available for debt service (FADS), indicates cash and investments available for debt service being greater than net adjusted debt. However, it is projected to increase to a peak of 7.2x in fiscal 2027 in Fitch's Analytical Stress Test (FAST) rating case.

The system is expected to move into a capital-intensive cycle and issue more debt over the next five to seven years to fund its participation in the Gross Reservoir Expansion project and replace one of its water treatment plants (WTP). This will likely push leverage above 7.0x in some years through 2030. However, in the longer term, leverage is expected to peak around this time before declining to a level consistent with the current rating, as capital spending moves back to historical levels, debt amortizes, and FADS grows with future rate increases.

Security

The bonds are secured by a first lien on the net revenues of the water system after payments of operations and maintenance expenses.

Key Rating Drivers

Revenue Defensibility - aa

Very Favorable Service Area, Affordable Rates for the Vast Majority of the Population

The city retains the legal authority to adjust rates as needed without external oversight. Fitch considers the monthly residential water bill affordable for about 90% of the service area population based on standard monthly usage of 7,500 gallons. The very favorable service area is characterized by stronger income levels, a moderate unemployment rate relative to the nation and midrange customer growth. Customer growth registered a five-year compound annual growth rate of 0.8% as of fiscal 2023. Income levels are about 44% higher than the national median as of 2023. The unemployment rate was 3% in 2023 and has averaged 17% less than the national level over the past four years.

Operating Risk - aa

Very Low Operating Cost Burden, Moderate Investment Needs

In fiscal 2023, the system's operating cost burden was considered very low at \$6,787 per million gallons (mg), consistent with the operating risk assessment. The life cycle ratio was very low at 27% in fiscal 2023. Capex to depreciation is robust averaging 510% over the last five fiscal years from 2019 to 2023. Planned capital spending for the next five years should generally outpace historical depreciation, supporting a continued very low life cycle ratio.

The five-year capital improvement plan (CIP) including estimated actual 2024 and projected 2025-2028 spend totals about \$406.9 million. A large portion of the CIP includes the city's share of the Denver Water Moffat Project (Gross Reservoir Expansion). This project is currently expected to complete construction around 2027, with filling of the reservoir after. In addition, the CIP includes replacement of the Arvada WTP.

Financial Profile - aa

Leverage to Increase

The system had leverage of -0.8x as of fiscal 2023 since available cash exceeds adjusted debt. Exceptionally low leverage increased in recent years as the system incurred debt as it moves into a more capital-intensive period. The liquidity profile is neutral to the overall assessment with current days cash on hand of 1,262 and coverage of full obligations (COFO) of 4.9x. Fitch-calculated total debt service coverage for fiscal 2023 was 7.6x, which excludes fixed service expense.

The FAST considers the potential trend of key ratios in a base case and stress scenario over a five-year period. The stress scenario is designed to impose capital costs 10% above expected base case levels and evaluate potential variability in projected key ratios. The FAST reflects Fitch's view of a reasonable scenario, which is generally informed by publicly available and/or management provided information with respect to capital expenditures, user charges and rate of revenue and expenditure growth.

In the base case scenario, the leverage ratio is expected to increase to 6.4x in fiscal 2027, then decline to 4.9x in fiscal 2028. In the stress scenario, which is considered the rating case, the leverage ratio is projected to increase to 7.2x in fiscal 2027, then decrease to 5.8x in fiscal 2028. Fitch expects the liquidity profile to remain neutral to the assessment over the five-year horizon.

Asymmetric Additional Risk Considerations

No asymmetric additive risk considerations affected this rating determination.

Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- Leverage sustained above 7.0x in Fitch's rating case after 2030, likely driven by sustained elevated capital spending.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Leverage sustained below 5.0x assuming maintenance of the current revenue defensibility and operating risk profile assessments. Due to the higher expected capital spending falling after 2027, an upgrade is not likely in the short term.

Profile

The system serves a growing population of about 122,000 via 40,100 individual connections. The service area lies about 10 miles northwest of Denver, CO and benefits from the economic diversity of Denver's

larger metropolitan statistical area. Local economic statistics are very favorable with the city exhibiting above-average income, low rates of unemployment, and steady customer growth.

Approximately 80% of raw water supply is provided by the Denver City and County Board of Water Commissioners (Denver Water; revenue bonds rated AAA/Negative) made available through two perpetual supply contracts. Remaining supply is from the city-owned Arvada Reservoir. While supply is sufficient over the medium term, the city and Denver Water are working together on the Denver Water Moffat Project (Gross Reservoir Expansion), which is anticipated to provide a drought-resistant supply through build-out.

Fitch considers the system a related entity of the city for rating purposes due to the city's oversight of the system, including the authority to establish rates and direct operations. The credit quality of the city does not currently constrain the bond rating. However, as a result of being a related entity, the issue rating could become constrained by a material decline in the general credit quality of the city.

Updated U.S. Environmental Protection Agency (EPA) Regulations

The city is addressing new regulations set forth by the U.S. Environmental Protection Agency (EPA). The EPA's enhanced focus on lead and copper lines and per- and polyfluoroalkyl substance (PFAS) contaminants has led to finalized Lead and Copper Rule Improvements (LCRI) along with specific testing requirements for PFAS chemicals. The system does not currently have any issues with detected PFAS compounds in treated water. In addition, the system is monitoring and replacing galvanized service lines to comply with the LCRI.

Revenue Defensibility

Revenue Source Characteristics

All revenue is derived from services or business lines exhibiting monopolistic characteristics.

Service Area Characteristics

Service area characteristics are considered very favorable. The five-year total customer count CAGR was midrange at around 0.8% in 2023. The city recently went through a growth period and is now expected to grow 1%-2% annually. Buildout is expected in the 2040 timeframe.

Income levels are considered stronger. The service area MHI was 144% the national average in 2023. Unemployment is considered midrange, at about 83% the nation rate in 2023.

Rate Flexibility

Residential rates include a fixed-charge component representing approximately 16% of the customer bill, which has been increasing over the last several years (fixed-charge component was 8% of monthly bill in 2021). The remainder of the bill is tied to usage. Based on Fitch's standard usage assumption of 7,500 gallons per month, the monthly bill was \$44.64 in 2023. This is affordable to the vast majority of the population.

Prior to 2022, rates increased incrementally at about 3%-4%. More recently, as the system entered a capital-intensive phase, rates increased more significantly. Fiscal 2022, 2023, and 2024 rates grew by around 10%, 16%, and 15%, respectively. Double digit rate increases are expected for the system through around 2030 to keep up with capital costs. Given the currently affordable rates, Fitch does not expect these rate increases to significantly impact overall affordability.

The 2022 rate adjustments also included the fee for new connections doubling from \$19,275 to about \$38,000. Connection fee revenue doubled in 2022 as a result. Connection fees remain higher than historical levels as the city continues to invest in growth, particularly in multi-family units.

Asymmetric Factor Considerations

No asymmetric rating factor considerations affect the revenue defensibility assessment. There is no concentration within the top 10 customers.

Operating Risk

Operating Cost Burden

The system's operating cost burden is considered very low at around \$6,800 per mg in 2023. This is over a 30% increase from the prior year, largely due to 2023 being a particularly wet year, causing water demand to decline by around 25%.

The system anticipates seeing small increases in purchased water costs over the next couple years. Management currently forecasts rates charged by Denver Water to increase by around 0.5% per year.

Capital Planning and Management

The system's life cycle ratio is considered very low at around 27%. Capital investment has been very robust over the past five years, and in 2023, the system had a five-year capex-to-depreciation average of 512%. Capital spending is expected to increase through 2030, as the system executes on a number of projects related to water supply and system infrastructure.

Estimated actual spending in 2024 along with budgeted spending between 2025 and 2028 CIP totals around \$406.9 million, a large portion of which includes the city's share of Denver Water's Moffat Project. This project will expand Denver Water's Gross Reservoir, which will allow the system to supply the city with water at full buildout needs. This is expected to be completed by 2027 and cost around \$96 million. In addition, the system is planning a replacement of its Arvada WTP. The WTP is expected to provide enough capacity to treat 27 million gallons per day (mgd), resulting in a combined capacity of 63 mgd when including the Ralston WTP's capacity. This is expected to be sufficient to handle full build out of the system's service area.

Other projects also focus on line replacements to address the EPA's lead and copper rule, meter replacements, and various projects tied to the Ralston WTP.

The CIP is anticipated to be largely debt funded, including the current issuance. Future debt issuances are currently slated for fiscals 2027, 2029, and 2032 at \$150 million, \$150 million, and \$13 million, respectively.

Asymmetric Factor Considerations

No asymmetric rating factor considerations affect the operating risk profile assessment.

Financial Profile and FAST Analysis

Leverage jumped year over year in 2022, from -5.2x to around -2.2x. This was mainly due to a \$50 debt issuance in November 2022. Leverage in 2023 remains extremely low at -0.8x. The liquidity profile is neutral. COFO was around 4.9x, and DCOH was about 1,262 in 2023. Fitch-calculated all-in debt service was 7.6x for the year.

Fitch Analytical Stress Test (FAST)

The FAST considers the potential trend of key ratios in a base case and a stress case. The base case reflects Fitch's expectation of both historical financial results and expected performance in a normal operating-cost environment, while the stress case is designed to impose capital costs 10% above expected base case levels and evaluate potential variability in projected key ratios.

The base case was informed by management and assumes that capital spending increases significantly over the next five years, to around \$406.9 million. To fund this, the system expects to issue around \$240 million over the forecast period and significant rate increases through at least 2030. Estimated 2024 revenues and expenditures were provided by management. The system also expects small increases in its purchased water costs. The FAST assumes that Denver Water increases its wholesale rate by 0.5% every year.

Factoring in the assumptions, leverage increases through the forward look to around 6.4x and 7.2x, in base and rating case, respectively. The metric is expected to continue to increase, as elevated capital spending continues until 2030. Thereafter, leverage should decrease to a level supportive of the current rating, as the system moves out of its capital-intensive cycle.

ESG Considerations

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
